Subject: Division Directive for Dust Events, June 2016, Kennecott Utah Copper; Bingham Canyon Mine; M/035/0002; Salt Lake County, Utah

Dear Mr. Schnoor:

On June 14, 2016, the Division of Oil, Gas and Mining received email correspondence concerning dust on the East Waste Rock Project. The Division has reviewed the photographs attached to the email correspondence. Rules R647-4-109.4 and R647-4-109.5 require that operations shall project impacts of mining operations on air quality and propose actions to mitigate the impact to air quality.

The Division requires that you provide:

1. A summary table of the air quality issues on June 5 through June 9, 2016, from the East Waste Rock project by July 14, 2016.
2. Provide a list of additional engineering controls to mitigate dust during construction for the East Waste Rock project by July 27, 2016.

Failure to provide this information by the deadlines shown may result in enforcement action.

Please call Leslie Heppler at 801-538-5257 or me at 801-538-5261 if you have questions about this letter. Thank you for your cooperation.

Sincerely,

Paul B. Baker
Minerals Program Manager
